

## Rose (Shrub), Watercolors Home Run

*Rosa 'WEKclaflobo'*

Height: 4 feet

Spread: 4 feet

Sunlight: 

Hardiness Zone: 4a

Other Names: Water Colors Home Run Rose

Group/Class: Shrub Rose

### Description:

Ever-changing blooms of yellow, blush pink and cerise red over contrasting deep green foliage that starts out red; perfect for the garden, along walks, or as an informal hedge; all roses need full sun and well-drained soil

### Ornamental Features

Rose (Shrub), Watercolors Home Run features showy lightly-scented yellow flowers with white overtones, gold eyes and red tips at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges red in spring. The glossy oval compound leaves do not develop any appreciable fall color.

### Landscape Attributes

Rose (Shrub), Watercolors Home Run is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Shrub), Watercolors Home Run is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Rose (Shrub), Watercolors Home Run will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
