Rose (Hybrid Tea), Sweet Mademoiselle

Rosa 'MElnostair'

Height: 5 feet

Spread: 4 feet

Sunlight: 

Hardiness Zone: 5b

Group/Class: Hybrid Tea Rose

Description:

Ovoid buds open into large, full blooms in tones of rose-pink with orange-pink shading; exquisite fruit and lemon fragrance; abundant, continuous bloom on a vigorous plant with great disease resistance; an excellent cut flower

Ornamental Features

Rose (Hybrid Tea), Sweet Mademoiselle features showy fragrant rose flowers with pink overtones and a orange flare at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves turn yellow in fall.

Landscape Attributes

Rose (Hybrid Tea), Sweet Mademoiselle is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Hybrid Tea), Sweet Mademoiselle is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

Planting & Growing

Rose (Hybrid Tea), Sweet Mademoiselle will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
