

**Rose (Hybrid Tea), All Dressed Up**  
*Rosa 'WEKgrasucejuc'*

Height: 6 feet

Spread: 4 feet

Sunlight: 

Hardiness Zone: 4a

Group/Class: Grandiflora Rose

**Description:**

A lovely, upright rose shrub with clean, green foliage and large, full, soft pink blooms in abundance; flowers have a mild, green apple fragrance; hardy and highly disease resistant, this selection is an all around garden shrub

**Ornamental Features**

Rose (Hybrid Tea), All Dressed Up features bold pink flowers at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has green deciduous foliage. The serrated oval compound leaves turn yellow in fall. The spiny brick red bark adds an interesting dimension to the landscape.

**Landscape Attributes**

Rose (Hybrid Tea), All Dressed Up is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Hybrid Tea), All Dressed Up is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

Rose (Hybrid Tea), All Dressed Up will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
