

Yarrow, Little Moonshine

Achillea 'ACBZ0002'

Height: 12 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ☉

Hardiness Zone: 4a

Description:

A compact variety presenting large clusters of bright yellow flowers in summer, over tidy clumps of finely cut gray-green foliage; removing spent flowers encourages re-blooming; perfect for small garden spaces and containers

Ornamental Features

Yarrow, Little Moonshine is smothered in stunning yellow flat-top flowers at the ends of the stems from late spring to late summer. The flowers are excellent for cutting. Its attractive tomentose ferny leaves remain grayish green in color throughout the season.

Landscape Attributes

Yarrow, Little Moonshine is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees, butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading
- Self-Seeding

Yarrow, Little Moonshine is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Yarrow, Little Moonshine will grow to be about 10 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It prefers to grow in average to dry locations, and dislikes excessive moisture. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. It is not particular as to soil pH, but grows best in poor soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Yarrow, Little Moonshine is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
