

Rose (Hybrid Tea), Dream Come True Rosa 'Dream Come True'

Height: 6 feet Spread: 4 feet Sunlight: O

Hardiness Zone: 5b

Group/Class: Hybrid Tea Rose

Description:

Stunning color on a healthy vigorous bush; flawless double flowers make an impact as they open a clear yellow with ravishing crimson-red edges and white petals; sturdy long stems support huge blooms and deep green foliage; highly disease resistant as well

Ornamental Features

The Rose (Hybrid Tea), Dream Come True features showy yellow flowers with white overtones and crimson edges at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed in late fall.

Landscape Attributes

The Rose (Hybrid Tea), Dream Come True is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

The Rose (Hybrid Tea), Dream Come True is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

The Rose (Hybrid Tea), Dream Come True will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
