

**Rose (Hybrid Tea), Double Delight**  
*Rosa 'Double Delight'*

Height: 5 feet

Spread: 4 feet

Sunlight: ○

Hardiness Zone: 5b

Group/Class: Hybrid Tea Rose

**Description:**

Beautiful eye catching color gets noticed on this very popular hybrid; the prolific bush provides continuous blossoms of butter and cream petals that are edged in a deep ruby red; plant is compact with beautiful deep green disease resistant foliage

**Ornamental Features**

The Rose (Hybrid Tea), Double Delight is draped in stunning fragrant buttery yellow flowers with creamy white overtones and ruby-red edges at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed in late fall.

**Landscape Attributes**

The Rose (Hybrid Tea), Double Delight is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard.

Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

The Rose (Hybrid Tea), Double Delight is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

### **Planting & Growing**

The Rose (Hybrid Tea), Double Delight will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
