

Euonymus, Chollipo
Euonymus japonicus 'Chollipo'

Height: 12 feet

Spread: 6 feet

Sunlight:

Hardiness Zone: 6a

Other Names: Japanes Spindle Tree

Description:

An impressive dense oval shrub that grows quickly and tends to be more open in shade, dazzling variegated foliage is unaffected by direct sun making this selection great for screening; visually impressive as a border planting

Ornamental Features

Euonymus, Chollipo has attractive dark green foliage edged in creamy white with hints of grayish green on a plant with an upright spreading habit of growth. The glossy oval leaves are highly ornamental and remain dark green throughout the winter.

Landscape Attributes

Euonymus, Chollipo is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. It has no significant negative characteristics.

Euonymus, Chollipo is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary

Planting & Growing

Euonymus, Chollipo will grow to be about 12 feet tall at maturity, with a spread of 6 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.

Special Attributes

Evergreens need to be watered during the winter. Our desert climate especially in late winter to early spring evergreens can suffer during next growing season. An easy way to remember check for dryness on the holidays Halloween, Thanksgiving, New Year's Day, Valentines Day & Easter.
