

**Japanese Maple, Crimson Queen**  
*Acer palmatum 'Crimson Queen'*

Height: 6 feet

Spread: 8 feet

Sunlight: ● ●

Hardiness Zone: 5b

Other Names: *Acer palmatum* var. *dissectum* 'Crimson Queen'

Group/Class: Dissectum

**Description:**

A popular high quality small tree with rich deep purple foliage all season long and spectacular fall color in various shades of red and orange, compact and artistic growth habit. Needs wind protection and afternoon shade.

**Ornamental Features**

Japanese Maple, Crimson Queen is primarily valued in the landscape or garden for its highly ornamental weeping form. It has attractive deep purple deciduous foliage which emerges crimson in spring. The deeply cut ferny palmate leaves are highly ornamental and turn outstanding shades of scarlet and orange in the fall.

**Landscape Attributes**

Japanese Maple, Crimson Queen is an open multi-stemmed deciduous shrub with a rounded form and gracefully weeping branches. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Japanese Maple, Crimson Queen is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

### **Planting & Growing**

Japanese Maple, Crimson Queen will grow to be about 6 feet tall at maturity, with a spread of 8 feet. It has a low canopy with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 80 years or more.

This shrub does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
