

Rose (Floribunda), Pumpkin Patch

Rosa 'Pumpkin Patch'

Height: 4 feet

Spread: 3 feet

Sunlight: 

Hardiness Zone: 4b

Group/Class: Floribunda Rose

Description:

A scrumptious new rose color that captures the hues of ripe pumpkins lying in the field in fall; fragrant caramel orange and copper blooms form perfectly in cluster atop deep green glossy leaves; very good disease resistance and a multiple bloomer

Ornamental Features

Rose (Floribunda), Pumpkin Patch is bathed in stunning lightly-scented harvest gold recurved flowers with orange overtones and coppery-bronze centers at the ends of the branches from mid spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Rose (Floribunda), Pumpkin Patch is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Floribunda), Pumpkin Patch is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Rose (Floribunda), Pumpkin Patch will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
