

**Rose (Miniature), Ruby Ruby**  
*Rosa 'Ruby Ruby'*

Height: 24 inches

Spread: 24 inches

Sunlight: ☉

Hardiness Zone: 5b

Group/Class: Miniature Rose

**Description:**

A lovely eye catching miniature producing clusters of velvety-red blooms that re-appear all season long; disease resistant foliage is a beautiful dark glossy green and provides excellent contrast; great for smaller garden areas and containers

**Ornamental Features**

Rose (Miniature), Ruby Ruby is blanketed in stunning red flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

**Landscape Attributes**

Rose (Miniature), Ruby Ruby is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Miniature), Ruby Ruby is recommended for the following landscape applications;

- Accent
- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

### **Planting & Growing**

Rose (Miniature), Ruby Ruby will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Rose (Miniature), Ruby Ruby makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
