

Rose (Hybrid Tea), Touch of Class
Rosa 'Touch of Class'

Height: 5 feet

Spread: 4 feet

Sunlight: 

Hardiness Zone: 4b

Group/Class: Hybrid Tea Rose

Description:

A little slice of paradise; this brightly-hued hybrid tea features splendid blossoms starting from high centered buds and open to a coral pink with shell pink highlights; it will make a strong focal point in the garden or along borders

Ornamental Features

Rose (Hybrid Tea), Touch of Class features showy coral-pink flowers with shell pink overtones at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has attractive dark green deciduous foliage. The glossy oval compound leaves are highly ornamental and turn yellow in fall.

Landscape Attributes

Rose (Hybrid Tea), Touch of Class is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Hybrid Tea), Touch of Class is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

Planting & Growing

Rose (Hybrid Tea), Touch of Class will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
