Group/Class: Floribunda Rose

Description:

Stunning yellow double blooms with brushes of shell pink and red edges create tremendous visual impact when massed in the garden; blooms repeat all season long and make splendid cut flowers; strong fragrance

Ornamental Features

Rose (Floribunda), Sheila's Perfume features showy fragrant double yellow flowers with shell pink overtones and red edges at the ends of the branches from early summer to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Rose (Floribunda), Sheila's Perfume is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Rose (Floribunda), Sheila's Perfume is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Rose (Floribunda), Sheila's Perfume will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Special Attributes

Pre-spring Cleanup Late January into February cut back to about 24 inches tall. Remove criss-crossing canes, thin out a fifth of the older canes, remove dead or weak canes , clean up any damage, open up the center of Floribunda Roses. Deadhead after blooming.
