Pear, (Ornamental) Chanticleer

Pyrus calleryana 'Chanticleer'

Height: 40 feet

Spread: 15 feet

Sunlight: ○

Hardiness Zone: 5a

Other Names: Callery Pear

Description:

A tall and narrowly upright accent tree covered in attractive white flowers in spring followed by small inedible fruit, good fall color, very ornamental, symmetrical form makes for a prominent vertical accent; resistant to fireblight

Ornamental Features

Pear, (Ornamental) Chanticleer is clothed in stunning clusters of white flowers with purple anthers along the branches in mid spring before the leaves. It has dark green deciduous foliage. The glossy heart-shaped leaves turn an outstanding deep purple in the fall. The fruits are showy yellow pomes displayed in late summer.

Landscape Attributes

Pear, (Ornamental) Chanticleer is a dense deciduous tree with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance tree that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Pear, (Ornamental) Chanticleer is recommended for the following landscape applications;

- Accent
- Shade
- Vertical Accent

JOB'S NURSERY, LLC
GROWING SINCE 1940

Planting & Growing

Pear, (Ornamental) Chanticleer will grow to be about 40 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 5 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Clean up Rating (1-5) 1=least effort 5=most effort

Clean Up Rating (4) The ornamental pear produces small, green pea-size berries, that turn red-brown in the fall and persists into winter, that birds like. Berries can be scooped up and bagged. Blooms and leaves can be blown or raked onto the lawn and mowed or bagged.
