

**Weigela, Spilled Wine**  
*Weigela florida 'Bokraspiwi'*

Height: 3 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 4a

**Description:**

An impressive variety that forms a low mounded shrub with deep dark foliage that doesn't fade to green; hot pink trumpet-shaped flowers attract hummingbirds in spring; very showy, ideal for the mixed garden border

**Ornamental Features**

Weigela, Spilled Wine features showy clusters of hot pink trumpet-shaped flowers with buttery yellow anthers along the branches from late spring to early summer. It has attractive dark red deciduous foliage. The pointy leaves are highly ornamental and turn an outstanding burgundy in the fall.

**Landscape Attributes**

Weigela, Spilled Wine is a dense multi-stemmed deciduous shrub with a mounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Weigela, Spilled Wine is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use

### **Planting & Growing**

Weigela, Spilled Wine will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
