Height: 40 feet

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 4b

Other Names: Trumpetcreeper

**Description:**

An extremely beautiful cultivar of this very vigorous vine, can grow tens of feet in a year; beautiful sulfur-yellow trumpet-shaped flowers in summer; does well in poor soils; extremely attractive to hummingbirds

**Ornamental Features**

Trumpet Vine, Yellow (Flava) features bold clusters of buttery yellow trumpet-shaped flowers at the ends of the branches from early summer to early fall. It has dark green deciduous foliage. The large serrated pointy pinnately compound leaves turn yellow in fall.

**Landscape Attributes**

Trumpet Vine, Yellow (Flava) is a dense multi-stemmed deciduous woody vine with a twining and trailing habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance woody vine that will require regular care and upkeep, and can be pruned at anytime. It is a good choice for attracting birds and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering
- Invasive

Trumpet Vine, Yellow (Flava) is recommended for the following landscape applications;

- Hedges/Screening
- General Garden Use

**Planting & Growing**

Trumpet Vine, Yellow (Flava) will grow to be about 40 feet tall at maturity, with a spread of 24 inches. As a climbing vine, it tends to be leggy near the base and should be underplanted with low-growing facer plants. It should be planted near a fence, trellis or other landscape structure where it can be trained to grow upwards on it, or allowed to trail off a retaining wall or slope. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This woody vine does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
