

Potentilla, Mango Tango
Potentilla fruticosa 'Mango Tango'

Height: 24 inches

Spread: 3 feet

Sunlight: ○ ●

Hardiness Zone: 2a

Other Names: Bush Cinquefoil, Shrubby Cinquefoil

Description:

A new variety that's extremely dense and compact with showy yellow flowers streaked with orange from July until frost and fine textured foliage; tough, hardy and adaptable, rarely requires pruning, excellent in mass plantings

Ornamental Features

Potentilla, Mango Tango has yellow flowers with orange centers at the ends of the branches from late spring to early fall. It has light green deciduous foliage. The small ferny compound leaves do not develop any appreciable fall color.

Landscape Attributes

Potentilla, Mango Tango is a dense multi-stemmed deciduous shrub with a more or less rounded form. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

- Mass Planting
- General Garden Use

Planting & Growing

Potentilla, Mango Tango will grow to be about 24 inches tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. To help this plant achieve its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
