Plant Height: 6 inches

Flower Height: 8 inches

Spread: 14 inches

Sunlight: ◐ ●

Hardiness Zone: 4a

Other Names: Carpet Bugle

Description:

A vigorous, low growing and spreading selection that features stunning scalloped, variegated green, cream and purple foliage; blue flower spikes appear in the spring and into the early summer; deadhead spent flowers

Ornamental Features

Ajuga, Burgundy Glow's attractive small crinkled round leaves emerge burgundy in spring, turning dark green in color with showy creamy white variegation and tinges of purple the rest of the year on a plant with a spreading habit of growth. It features subtle spikes of sky blue flowers rising above the foliage from mid spring to early summer.

Landscape Attributes

Ajuga, Burgundy Glow is a dense herbaceous evergreen perennial with a ground-hugging habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Ajuga, Burgundy Glow is recommended for the following landscape applications;

- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting
- Hanging Baskets

Planting & Growing

Ajuga, Burgundy Glow will grow to be only 6 inches tall at maturity extending to 8 inches tall with the flowers, with a spread of 14 inches. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Ajuga, Burgundy Glow is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

Special Attributes

Needs shade from 11 am to 7 pm in the summer, heat tolerant and low maintenance;
