Baptisia, Cherries Jubilee False Indigo

Baptisia 'Cherries Jubilee'

Height: 3 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 4a

Other Names: False Indigo

Group/Class: Decadence Series

Description:

Unique maroon spikes of pea-flowers with a yellow keel rise from medium green foliage in late spring; use this plant for its outstanding display of vertical flowers as an accent in the garden or borders

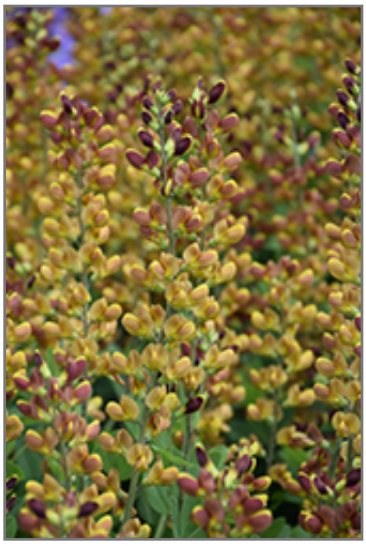

Ornamental Features

Baptisia, Cherries Jubilee False Indigo has masses of beautiful spikes of burgundy pea-like flowers with yellow overtones rising above the foliage from late spring to early summer, which are most effective when planted in groupings. The flowers are excellent for cutting. Its oval leaves remain green in color throughout the season. The fruits are showy black pods displayed in late summer.

Landscape Attributes

Baptisia, Cherries Jubilee False Indigo is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting bees and butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Planting & Growing

Baptisia, Cherries Jubilee False Indigo will grow to be about 28 inches tall at maturity, with a spread of 3 feet. It tends to be leggy, with a typical clearance of 1 foot from the ground, and should be underplanted with lower-growing perennials. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 25 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type, but has a definite preference for alkaline soils, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Baptisia, Cherries Jubilee False Indigo is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
