Aglaonema, Silver Bay Chinese Evergreen

Aglaonema 'Silver Bay'

Height: 3 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 10b

Description:

A very popular container plant that is very easy to grow; survives poor lighting and low ventilation; large, showy variegated green leaves with silver centers; only planted outdoors in the warmest areas

Ornamental Features

Aglaonema, Silver Bay Chinese Evergreen's attractive pointy leaves emerge chartreuse in spring, turning dark green in color with pointy silver spines and tinges of grayish green throughout the season on a plant with an upright spreading habit of growth.

Landscape Attributes

Aglaonema, Silver Bay Chinese Evergreen is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and may require the occasional pruning to look its best. It has no significant negative characteristics.

Aglaonema, Silver Bay Chinese Evergreen is recommended for the following landscape applications;

- Accent
- General Garden Use
- Container Planting

Planting & Growing

Aglaonema, Silver Bay Chinese Evergreen will grow to be about 3 feet tall at maturity, with a spread of 3 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is quite intolerant of urban pollution, therefore inner city or urban streetside plantings are best avoided. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Aglaonema, Silver Bay Chinese Evergreen is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

For plants rated USDA zone 7, these plants survive our average winter conditions, however, they may need mulching or winter protection when we get extreme winter conditions like low teens or single digits. For plants rated USDA zone 8 and above, these plants will not survive our winter temperatures, so they need to be either brought inside or replaced annually.
