Plant Height: 15 inches

Flower Height: 20 inches

Spread: 18 inches

Spacing: 14 inches

Sunlight: ○ ◐

Hardiness Zone: 2b

Group/Class: EveryDaylily Series

Description:

This reblooming, dwarf daylily produces delightful pink and cream trumpets with dark pink halos and yellow throats; pretty ruffled blooms; sturdy, strong, easy to care for, with great grassy texture and form; perfect for containers, beds, and borders

Ornamental Features

Hemerocallis, EveryDay Pink Wing Daylily features bold salmon trumpet-shaped flowers with creamy white overtones, yellow throats and pink centers at the ends of the stems from early summer to mid fall. The flowers are excellent for cutting. Its grassy leaves remain green in color throughout the season.

Landscape Attributes

Hemerocallis, EveryDay Pink Wing Daylily is an herbaceous perennial with a shapely form and gracefully arching foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Hemerocallis, EveryDay Pink Wing Daylily is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Groundcover

JOB'S NURSERY, LLC
GROWING SINCE 1940

Planting & Growing

Hemerocallis, EveryDay Pink Wing Daylily will grow to be about 15 inches tall at maturity extending to 20 inches tall with the flowers, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
