Prismacolor™ Pink Princess Philodendron

Philodendron 'Pink Princess'

Height: 6 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 10b

Group/Class: Leafjoy Houseplants

Description:

This highly sought after showstopper presents hot pink variegation on deep green leaves; no two plants are identical and the variegation will vary from plant to plant. a gorgeous, low maintenance houseplant for low to medium light areas

Features & Attributes

Prismacolor Pink Princess Philodendron's attractive large glossy heart-shaped leaves remain dark green in color with showy hot pink variegation and tinges of creamy white throughout the year on a plant with an upright spreading habit of growth. The crimson stems are very effective and add to the plant's interest.

This is a dense herbaceous evergreen houseplant with an upright spreading habit of growth. This plant should not require much pruning, except when necessary to keep it looking its best.

Planting & Growing

When grown indoors, Prismacolor Pink Princess Philodendron can be expected to grow to be about 6 feet tall at maturity, with a spread of 3 feet. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
