Rose (Hybrid Tea), Gold Medal

Rosa 'AROyqueli'

Height: 5 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 5b

Group/Class: Hybrid Tea Rose

Description:

A unique rose with typical tea flowers in a rich gold, but with the slightest hint of copper-peach along the edges of the petals to lend a touch of elegance; all roses need full sun and well-drained soil

Ornamental Features

Rose (Hybrid Tea), Gold Medal is draped in stunning fragrant double gold flowers with peach edges at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn yellow in fall.

Landscape Attributes

Rose (Hybrid Tea), Gold Medal is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Planting & Growing

Rose (Hybrid Tea), Gold Medal will grow to be about 5 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
