Height: 3 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 5b

Other Names: French Hydrangea, Bigleaf Hydrangea

Group/Class: Cityline Series

Description:

This selection was bred for sturdy stems that hold heavy flower heads, has more flowering stems than other hydrangeas; one of the showiest and most desired summer-blooming garden plants with large, hot pink lacecap flowers that get more blue in acid soil

Ornamental Features

Hydrangea, Cityline Venice features bold fuchsia lacecap flowers with blue overtones at the ends of the branches from mid summer to mid fall. The flowers are excellent for cutting. It has forest green deciduous foliage. The glossy pointy leaves do not develop any appreciable fall color.

Landscape Attributes

Hydrangea, Cityline Venice is a multi-stemmed deciduous shrub with a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Hydrangea, Cityline Venice is recommended for the following landscape applications;

Planting & Growing

Hydrangea, Cityline Venice will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type, but has a definite preference for acidic soils. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in both summer and winter to conserve soil moisture and protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.

Hydrangea, Cityline Venice makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

Special Attributes

Grows best in Eastern Washington and Oregon Desert climate, when shaded from 11 am to 7 pm.
