Burning Bush, Compact Winged

Euonymus alatus 'Compactus'

Height: 5 feet

Spread: 5 feet

Sunlight: ○ ◐ ●

Hardiness Zone: 4a

Other Names: Winged Euonymus, Burningbush

Description:

A spectacular and compact garden shrub which turns a luminous florescent pink color in fall, very showy; a shapely mounded growth habit and interesting corky wings on the branches; a very popular and adaptable landscape plant

Ornamental Features

Burning Bush, Compact Winged has rich green deciduous foliage on a plant with a round habit of growth. The pointy leaves turn an outstanding cherry red in the fall. It produces red capsules from early to late fall. The warty brown bark and harvest gold branches add an interesting dimension to the landscape.

Landscape Attributes

Burning Bush, Compact Winged is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Burning Bush, Compact Winged is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Burning Bush, Compact Winged will grow to be about 5 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub performs well in both full sun and full shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. This plant should be periodically fertilized throughout the active growing season with a specially-formulated acidic fertilizer. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
