Crabapple, Flowering Adams

Malus 'Adams'

Height: 25 feet

Spread: 20 feet

Sunlight: ○

Hardiness Zone: 4a

Other Names: Roseybloom, Crabapple

Description:

This highly ornamental selection features showy pink flowers in spring and persistent bright red berries in fall, spreading habit of growth; the definitive ornamental accent for the front yard, needs well-drained soil and full sun

Ornamental Features

Crabapple, Flowering Adams is smothered in stunning clusters of fragrant pink flowers along the branches in mid spring, which emerge from distinctive cherry red flower buds before the leaves. The fruits are showy red pomes carried in abundance from early to late fall. It has brick red-tipped dark green foliage which emerges burgundy in spring. The pointy leaves turn yellow in fall.

Landscape Attributes

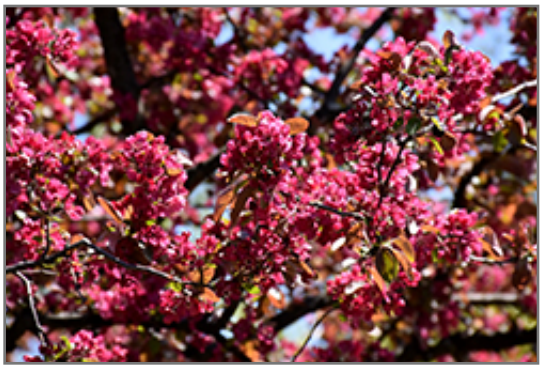

Crabapple, Flowering Adams is a deciduous tree with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Crabapple, Flowering Adams is recommended for the following landscape applications;

Planting & Growing

Crabapple, Flowering Adams will grow to be about 25 feet tall at maturity, with a spread of 20 feet. It has a low canopy with a typical clearance of 4 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 50 years or more.

This tree should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Clean up Rating (1-5) 1=least effort 5=most effort

Clean Up Rating (2): The deep pink buds opening to single pink blooms in spring; then set 1/2 inch glossy bright red berries that birds eats during winter. Berries are persistent, meaning they stay on the tree until they dry. The dried berries and leaves can be blown or raked onto the lawn and mowed or bagged.
